EPA COMPLIANT MOBILE GENERATOR

Doosan Portable Power is proud to offer one of the coolest and quietest generators on the market, the G150 T4F. The G150 features a revolutionary enclosure design that creates separate compartments for the powertrain and cooling system. The cooling system utilizes radial cooling fan technology- an industry first for mass production applications. Doosan Portable Power has a legacy of engineering rugged, dependable machines, able to withstand any terrain or harsh environment. The G150 has an impressive 43 hours of onboard fuel and the ability to operate in extreme temperatures, assuring reliable performance regardless of conditions.

The G150 Tier-4F generator from Doosan Portable Power delivers the coolest and quietest mid-range T4i package on the market. At 100% load, the G150 delivers 150 kVA (120 kW) at 67 dB(A). For increased versatility, the G150 is equipped with a standard Dual-Frequency switch that allows the generator to change from 50Hz to 60Hz. Rugged running gear and a hardened enclosure safeguard Doosan Portable Power's legacy of durable, dependable machines that stand up to harsh environments. An optional Tundra Package ensures performance in extreme cold, allowing the G150 to operate in temperatures as low as -40°F/°C. The package includes a coolant heater, oil pan heater, battery charger, battery heater pad, and heated breather hose.

A fuel efficient, Tier 4i-compliant Cummins QSB7 T4F engine has an improved fuel economy, making the G150 T4F able to run for 43 hours at 100% load. Doosan's industry-leading serviceability continues with 500-hour service intervals. The G150 T4F is equipped with a Leroy-Somer alternator with AREP, protecting against overload and short-circuiting, offering voltage stability and a greater motor starting capacity.
