Float Switch Range

Tether length	Pumping range
3.5 (in)	7 (in)
6 (in)	10 (in)
10 (in)	16 (in)
14 (in)	22 (in)
18 (in)	28 (in)
22 (in)	33 (in)
24 (in)	36 (in)

Note: Due to weight of cable, pumping range above horizontal is NOT equal to pumping range below horizontal. As tether length increases, so does the variance of the pumping range. Pumping ranges are based on testing in non-turbulent conditions. Actual conditions may vary.

Tsurumi's new design features an angled casing and discharge connector. The unique slotted design of the discharge connectors bolt holes, provides for quick conversion from vertical to horizontal discharge configuration. This allows the end use to configure the LB-800 to the installation, thereby providing for more stable operation and at the same time reducing kinking of the discharge hose
