**FULLY AUTOMATIC, BATTERY-POWERED WATER TANK**

## CONCRETE CUTTING IS NOW A ONE-MAN JOB.

The fully automatic, battery-powered WSA 40 water tank eliminates the need for manual pumping when operating a TS or TSA cut-off machine and provides a steady water supply to the machine. Easily adjust the pressure between 22-36 psi for precise water delivery and dispense up to 12 tanks of water with one AS 2 battery.

### CONSTANT POWER, REGARDLESS OF BATTERY CHARGE STATUS.

With other brands of battery tools, the performance usually decreases during work as the battery discharges. This is not the case with STIHL cordless power tools with **CONSTANT POWER**. Thanks to the intelligent electronics, your STIHL power tool works with consistently high power.

Rated voltage	11 V
Max. voltage	12 V
Recommended battery	AS 2
Cordless power system	AS
Device weight	6.8 lb
